ARPIT KUMAR

CYBERSECURITY INTERN | SOC / BLUE TEAM | VAPT / WEB SECURITY

Jaipur, Rajasthan, India | +91 9142170211 | arpitkumar0211@gmail.com

LinkedIn | Portfolio | GitHub | TryHackMe | Hack The Box | GeeksforGeeks

PROFESSIONAL SUMMARY

B.Tech Information Technology student at Arya College of Engineering and IT with a **9.6 SGPA**, building practical foundations in SOC operations, defensive investigation, and VAPT through Linux/networking study, authorized labs, and software projects. Built a **Python SSH authentication-log analyzer** with threshold alerts and CSV reporting. Seeking an internship involving log analysis, **alert triage**, security testing within approved scope, and clear technical documentation.

TECHNICAL SKILLS

SOC & Defensive Security: **SSH authentication-log analysis**, event review, monitoring concepts, **basic alert triage**, incident-response fundamentals, investigation documentation

VAPT & Web Security: **Reconnaissance, enumeration**, CTF-style labs, web security fundamentals; **Nmap, Wireshark, Burp Suite, Metasploit**

Systems & Programming: Linux, networking fundamentals, Python, C, C++, Java, JavaScript, TypeScript, Dart, SQL

Development & Platforms: Next.js, React, HTML/CSS, Tailwind, Flutter, FastAPI, Node.js/Express, WebSockets, MySQL, PostgreSQL, MongoDB, Supabase, Firebase, Neon, Docker, Git/GitHub, Vercel, Render, Railway

PROJECTS

- **SOC Log Analyzer - SSH Authentication Monitoring** | *Python, CLI, CSV [Built]* - Parses Linux-style SSH logs, summarizes successes/failures by IP and username, flags repeated failures, and exports **CSV reports**.
- **Phishing Email Analyzer** | *Python, email/header analysis [In progress]* - Planned offline .eml workflow to inspect sender/header details, extract URLs/IPs, flag suspicious indicators, and produce a review report.
- **Sports Media Protection** | *Python, perceptual hashing [Concept]* - Concept to detect visually similar/reused match-day media and support manual review with planned authenticated scans and audit history.
- **GreenFlow - Smart Traffic Management** | *FastAPI, WebSockets, Supabase, Next.js, Flutter [Prototype]* - Prototype for traffic monitoring, live dashboard events, prediction workflows, and emergency green-corridor activation.
- **EduAI Nexus X - AI Learning Platform** | *Next.js, React, TypeScript, FastAPI [Development]* - Structured an AI-assisted education platform with a frontend/backend monorepo and separately deployable application services.
- **StudyForge - AI Study Notes Generator** | *Next.js, TypeScript, FastAPI, Supabase/pgvector [Design/development]* - Designed a study-notes platform with a responsive web UI, API layer, and planned PostgreSQL/vector retrieval for learning content.
- **CarePulse - Hospital Digital Attendance** | *Flutter, Dart, Riverpod, Firebase, NFC/geolocation [Product planning]* - Planned hospital attendance flows using authentication, location, NFC and local device-authentication components.
- **NCC Buddy - Mobile Application** | *Flutter, Firebase, Firestore, FCM [Planning]* - Outlined Android/iOS app architecture with OTP login, cloud data storage, and push-notification workflows.
- **Smart Armoury Locker Node** | *ESP32/Pico W, RFID, fingerprint, load cell [Hardware design]* - Designed a connected locker concept combining RFID/fingerprint access and load-cell monitoring for physical-security signals.
- **Krishi Sahayak - Agriculture Support App** | *Flutter, Dart [Scaffold]* - Created the mobile-app scaffold and dependency configuration for an agriculture-support application.
- **Hospital Management System** | *Java, MySQL [Academic]* - Built an academic desktop application with database connectivity for hospital workflows and structured data storage/retrieval.
- **Food Ordering System** | *Java Swing, MySQL [Academic]* - Built a GUI-based academic project connecting food-ordering workflows to relational data storage.

EDUCATION & TRAINING

B.Tech, Information Technology - Arya College of Engineering and IT, Jaipur | 2024-2028 | **SGPA: 9.6**

Class XII, CBSE - ABR Foundation School, 2023 | **Class X, CBSE** - Dedicated Public School, 2021

Data Science with AI - Internshala Trainings, 8 weeks (Jul 2026): data analysis, AI-powered Excel, Power BI/Tableau, predictive analytics and machine learning.

GRRAS Solutions - Training certificate with **distinction** (2 Jun 2026): Linux, web development, GitHub, networking and prompt engineering.

DEVELOPMENT & DEPLOYMENT PRACTICE

Worked with **Vercel, Render, Supabase and Neon** deployment paths for web frontends, APIs and databases; troubleshot **TypeScript build checks**, Leaflet server-side rendering, API environment configuration, and database connection/migration issues.

CYBERSECURITY PRACTICE

TryHackMe and Hack The Box room-based labs/CTF exercises focused on Linux, networking, reconnaissance, enumeration, web-security basics, and defensive investigation.

LEADERSHIP

Leader, Arya E-Sports Club: Coordinate student activities, tournament planning, event logistics, registration, venue/internet needs, and team communication.
